

Kiss Ride Survey EEB3

Transport choice

transport	comment
Bicycle	As a rule bicycle which is the quickest way to get to school. Our child is not accompanied. Occasionally, we bring her to school by car though.
Bicycle	Service de bus scolaire très efficace. Seul problème: en maternelle, le transfert vers le bâtiment des maternelles n'est pas toujours optimal et la porte du bâtiment des maternelles est trop lourde pour être ouverte par un petit enfant tout seul. Pour les enfants de primaire connaissant l'école, il n'y a pas de problème.
On Foot	To walk to school is a first step to fight obesity and lack of exercise. At the same time it helps kids to gain confidence and it improves their orientation skills.
On Foot	I take my child to school on foot / pick-up with car
On Foot	Occasionally I bring my children by car
	Our child is accompanied by an adult, usually a parent, and always arrives on foot. A safer, larger pedestrian area would be most welcome, as there are currently backlogs at the entrance where badges/IDs are checked and again along the fence where two-way traffic is not possible. Arrival has also become more dangerous since some parents driving their kids to school do U-turns in the school's driveway (ie in front of the gates where pedestrians pass through) as well as on the pavement on the other side of the boulevard.
On Foot	We live nearby.
On Foot	live relatively close by, children (age 4 and 7) always accompanied
On Foot	Je cherche un stationnement plus loin pour la voiture et je viens à pied à l'école avec les enfants.
Other	Train - beaucoup plus pratique et plus rapide lorsqu'il est à l'heure ou pas supprimé.
Other	Transport commun

Kiss Ride Survey EEB3

- Other Tram, avant je les déposais quelques fois mais plus maintenant
Other by train. However, on some days we bring/pick-up the children by car.
The best and safest solution is the bus!
- I personally think it is wise not to open the garage in the morning, the traffic in and around the school is terrifying. Parents should make use of the school bus whenever possible. To open the school in the afternoon would be good; to keep it more flexible. But well, this is just my own few.
- Other train to Delta + on foot
- Firstly I'd like to welcome this initiative. Even though I don't agree with the solution proposed, I think it could be a good means to encourage parents to get more involved with the running of the school. The main reason I don't agree with kiss and Ride is that on the rare occasions I would like to bring the kids to school in the car, it is because I have some other reason to visit the school (e.g. meeting a teacher, or attending a class performance) so would want to leave the car in the garage for up to an hour. I also do not agree with any system based on granting discretionary access to parents based on for example medical needs or distance from home to school. In my opinion, such systems are open to abuse and the loudest parents would generally be successful in persuading/pestering the school to get such access. The best solution is card controlled access, limited in number of cars allowed in the garage at any one time (not number of badges however) to avoid overcrowding, effective policing to ensure that cars are not left during the day, with loss of parking badge the sanction in case of misuse of the car park.
- Public Transport It became almost impossible for me to combine bringing my child to school and going to work (by car). My child is accompanied by an adult on its way to school
- Public Transport Our children are at secondary classes. They come to school by metro or bike. However, sometimes they need to be picked up by our car (in cases when they e.g. go to see a doctor etc.).
- Public Transport Make the school better accessible for pedestrians. Hundreds of people have to pass through a very narrow access every morning, whereas cars, that are not allowed anymore... have all the space
- Public Transport Trajets en métro cette année, en bus scolaire l'année prochaine.
- Public Transport Actually I was not used to bringing my children by car, but I did a few times (when needed for specific reasons).
- Public Transport the child must be accompanied by a parent
- Schoolbus This system is easy, as the bus stop is located a few hundred meters from home, the schedule is convenient, since we live less than 5 km far from the school, and more environmentally-friendly. My kids are 16 and 10 and they walk from the courtyard to their classes alone.
- Schoolbus Mes enfants utilisent toujours le bus. Il m'est arrivé de venir à l'école pour déposer des objets ou rencontrer un enseignant. La meilleure solution est l'accès à tous les parents avec contrôle d'un badge parent à fournir par la Commission/l'école comme pour les garderies.

Kiss Ride Survey EEB3

Schoolbus	no need to go by car to school and risk anything because the school bus system is excellent. Parents have to adjust their thinking on how to bring in the children.
	Access to the parking is, however, needed to meet the teachers. Often this is most convenient BEFORE the classes start. Or to pick-up a child from the nursery.
Schoolbus	Why do you only consider one child in your survey? We have three at the school!! P1, P5 and S3.
Schoolbus	Les enfants prennent quotidiennement le transport de l'école.
Schoolbus	Sometimes I need to bring my children (maternelle and primary) by car.
Schoolbus	The badge system was fine before. There needs to be a possibility for parents to legally leave their car not only to drop off children, but also for teacher-parents meetings and other events at school, so beyond a simple kiss and ride. I welcome this survey, however, it would have been appropriate to hold the survey before taking such extensive measure as they were apparently taken with the consent of APEEE?
Schoolbus	we were forced to put our kid of 5 (so maternel!) on the schoolbus at 7:15 (!) because of the closure of the garage. Because of the measure we could not give an equal treatment to our two daughters (the older daughter was brought to school by car until primary school).
Schoolbus	Very practical, doesn't need to go to the parking by car. For me if possible it is the best solution. In the past I had to bring the kids by car and it was full catastrophe. Parents are very stressed, I saw also very dangerous situations in the garage. It should be stopped in my view.
Schoolbus	My office is very far from the school therefore it is impossible to drive the kids to school and the youngest to the creche and arrive at the office at a normal hour. I would suggest that the number plate of the parents that are illegally parking the car during all day is published on a list and entry is banned.
Schoolbus	vélo occasionnellement
Schoolbus	suite à notre déménagement plus proche
Schoolbus	I was bringing my daughter in exceptional cases only. she normally goes by schoolbus
Schoolbus	si je dépose mon enfant moi-même, je me gare à l'extérieur où l'on trouve toujours une place
Schoolbus	Depuis les mesures de sécurité à l'EEB3 et le réaménagement du boulevard Général Jacques, conduire aux abords de l'EEB3 est devenu un enfer...
Schoolbus	The school bus is the best, fastest and most environmental friendly way for the children to go to school.
Schoolbus	3 children: EN MAT a and b + EN P2.
Schoolbus	Kiss and drop would be for occasional needs (miss school bus etc)
Schoolbus	we still occasionally drop off the children by car
Schoolbus	brought the child by car approx. 1x per month, but then it was very useful to have a parking garage.

Kiss Ride Survey EEB3

Schoolbus	Mat on Fridays ends at 12.00, I used to go by car to pick up my child. Now it is impossible (and no garderie for my kid so far) I do not bring my child to school as he comes by bus, but I do collect him from school by car at least twice each week. However, the survey does not have questions relating to the collection of children after school.
Schoolbus	It is the easiest solution
Schoolbus	The closure of the garage worked out well for us since it allowed the transport service to include new stops on the bus route which benefitted our son.
Schoolbus	Nos enfants grandissent. Vu les conditions de circulation difficiles aux alentours de l'école, il est plus confortable pour eux (et pour les parents) de prendre le bus scolaire. Mais il est vrai que quand ils étaient en maternelles, nous les amenions en voiture.
	Q3: 2014/15 - two children in different schools. Impossible to collect both at the same time.
	Q6: P2EN & MAT EN
	Q8: an EU institution car vignette should be sufficient for school purposes. If the car has been cleared for parking under a top security threat building (EP or COM building) it should be unnecessary to require a second (costly) vignette just for school purposes. It goes without saying that the car driver must also have a valid EU institution service/spouse badge. As a matter of principle parents must not take over security related tasks which must remain the responsibility of the school's professional security services. Also, it is completely inappropriate for non-staff members to have responsibility for students whilst on school premises (eg looking after children in a busy car park during kiss and ride).
	Last question: I support the kiss and ride but only if operated by school staff. At the beginning of the school year 2014 it was managed by the school and it should be managed again by the school. Also I think the carpark should be open to parents with EU service/spouse badges + car vignette (issued by an EU institution). The key security check should be at the entrance to the school where school security must check that the car vignette matches the number plate of the car and the driver is the person on the badge which may require a second form of ID.
Schoolbus	occasional drop-off by car if needed otherwise by schoolbus
Schoolbus	default option, but would need easier access for "special occasions" (pick-up by car for playdates or medical reasons, class breakfasts at school, ..)
Schoolbus	I was not bringing my child to school but I was picking up my child from school and the security measures caused severe logistic issues at home and at work. Before the security measures 3 cars were used for this purpose depending on family logistics, which allowed my child to reach home sooner (there is no-one to pick-up the child on the schoolbus return trip). Now we all arrive home later as access to the school is only as of 17:00, homework is done later and the whole day is unnecessarily prolonged. Smth should be done about the pick-up as well pls!!!

Kiss Ride Survey EEB3

Schoolbus	There is an extensive schoolbus service, no need to bring children by car to school. This only causes additional traffic and pollution.
Schoolbus	Free (for parents) bus service is a huge privilege and parents not using it should think twice before complaining about the restrictive parking policy. Parking space at school is neither a human nor a civil right!
Schoolbus	No car parking at school, heavy traffic and both parents working full-time
	I take my children after periscolaires by car (if possible) such as Wednesday.
Schoolbus	I can't understand why with an invitation to meet a teacher we cannot access the parking by car.
Schoolbus	I can't understand why an EC badge to enter commission buildings is not enough for the security guards.
Schoolbus	Terrorism?: it's easier to wait and follow the bus leaving the school than going in the building.
Schoolbus	it's safer, less traffic, less stress and children are under the supervision of adults at all times
Schoolbus	Parnetal access by car outside school start/end times has to be facilitated by means of vignette issued to parents.
Schoolbus	Nevertheless it is needed few times to bring the children myself with my car. Even if this happens very occasionally it creates a big inconvenience and loss of time to seek parking slots in the neighbourhood area.
Schoolbus	Bicycle when weather permits
Schoolbus	Most convenient and quickest transport system. Try to avoid car for city traffic.
Schoolbus	Although my children take normally the school bus, on several occasions during the year (1st day of school, school trips, Springfest) etc. I brought them to school by car.
Schoolbus	School bus is a great service, all 3 of my children use it and I don't plan to change this.
	She is taking the schoolbus. It is very difficult though when the kids are sometimes sick and you have to come and pick them up + it is winter + you have parked far away.
Schoolbus	Comment for question number 6. My youngest daughter will be in MATEL next year. So please consider my replies for two Children.
Schoolbus	L'arrêt est à 200m de chez nous.
Schoolbus	However, on certain rare occasions we needed to bring (or take) the boys by car (for example, illness, small accidents, etc). In these cases it is absolutely important to have access to the parking by car.
Schoolbus	Any solution should be linked with the presence of police in the morning at least to regulate the traffic. Otherwise there will be enormous traffic jams every morning like the few days between the closure of the parking and the removal of the police from the streets. The security guys could not do the job. Actually several times they almost contributed to accidents. It did not help also the selfish and dangerous way in which some parents were driving. If the Kiss and Ride suggestion is implemented, the presence of police is crucial!
Schoolbus	Mon enfant prend généralement le bus. Je ne le dépose en voiture qu'à titre exceptionnel.
Schoolbus	Most of the time they come by school bus, but sometimes we need to drop them off by car, and fetch them by car. The closure of the garage is highly inconvenient and disproportionate as a measure.

Kiss Ride Survey EEB3

	<p>school bus system is very efficient and reduces traffic congestions.</p> <p>Access to the parking shall be enabled in general for appointments with teachers (parking outside during the day is virtually impossible).</p> <p>It is an excellent, relatively eco-friendly service that helps us a lot in our family's logistics. It's use would need to be encouraged at the expense of individual parents cars dropping off kids.</p> <p>bus école en général ou à pied de temps en temps ou en voiture exceptionnellement</p> <p>Schoolbuses are reliable, always on time and my children meet friends.</p>
Schoolbus	<p>Mon fils est inscrit à la Maternelle pour l'année 2015-2016 donc je n'ai pas une expérience du passé. Mais j'ai trouvé très embêtant de ne pas avoir la possibilité de me garer au parking quand je l'ai amené à l'école, par exemple, le jour des "portes ouvertes". Pour l'hiver surtout, même si je vais utiliser le bus de l'école, je trouve très utile d'avoir la possibilité de se garer pour une courte durée (comme on fait actuellement à la crèche - jardin d'enfant de la Commission avec l'utilisation d'un badge spécial) pour amener le matin les petits enfants ou les récupérer en fin journée ou si ils sont malade etc...</p> <p>Etant très difficile de déposer les enfants à l'école, le bus est indispensable. Toutefois la liberté de pouvoir les déposer parfois ou en cas de force majeure serait une énorme facilité et c'est très dommage d'être confrontés à ces problématiques, en considérant qu'il est pratiquement impossible de se garer à proximité</p>
Schoolbus	<p>I chose the school bus so that I can avoid coming to school in the morning traffic. However, twice per week I had to pick up my kids from school because there was no bus service.</p>
Schoolbus	<p>It is more convenient</p>
Schoolbus	<p>Mes enfants prennent le bus de l'école mais lorsque mon dernier rentrera en maternelle, je souhaiterais pouvoir l'accompagner en voiture</p>
	<p>This is the most sustainable and safest solution that contributes minimally to congestion and ensures that children get used to travelling on transport with others rather than being little kings in their chauffeur-driven cars. We should encourage sustainable mobility; if parents want to accompany their children to school there is a train station and an underground station nearby. We should use the opportunity presented by the terrorist threat to dissuade car use.</p>
Schoolbus	<p>In question 7d), how do you define "car-dependent". It sounds like an illness that could be cured with a dose of public transport...</p>
Schoolbus	<p>But sometimes we need to come by car to help or volunteer or to visit a teacher</p>
Schoolbus	<p>Bus École car nous n'avons pas d'autres choix</p>
Schoolbus	<p>Only on the exceptional bases (when we miss the school bus), we will bring the children by car</p>
Schoolbus	<p>access to school outside of start/finish times should also be facilitated by means of badge/vignette.</p>

Kiss Ride Survey EEB3

Schoolbus	Tout dépend de l'horaire des enfants une en P4 et maintenant une en P1 (je suppose donc que j'utiliserais le parking un peu plus régulièrement vu les horaires des P1) et également si le bus est fort en retard.
Schoolbus	most comfortable option in our specific circumstances. I have never used the underground parking yet.
Schoolbus	2/month I take my children from the school by car
Schoolbus	Suite à la fermeture du parking j'a limitee mes frequentations, ceci limite enormement le contact avec le professeur et aussi avec autres parents
Schoolbus	Avoid traffic jams, ecology, efficiency
Schoolbus	In the past I used the garage only occasionally when I needed to go by car. I am currently using the parking space of adjacent university in case I need to bring the child to the school by car, when I need to bring stuff to the school or when I have a meeting in the school.
Schoolbus	Sometimes I just drop the kid on the pavement right in front of the guards. Although my children usually take the bus, occassionaly we like to drop them off, either by bike or car. This is important to remain in touch with the school. On those occassions having access to the car park would be very convenient. Obviously a kiss and ride system would not be suficient for this purpose.
Schoolbus	Furthermore, I would like to argue that any system needs to be linked to a security policy: higher threat level, stricter rules for access to the parking.
Schoolbus	We bring our child by car only if it has to carry heavy or bulky things.
Schoolbus	On Fridays exceptionally I picked up my child by car
Schoolbus	Ecological, close is bus station.
Schoolbus	In the case we miss the schoolbus, we used to bring the child by car. After the closure of the garage, the only way was by taxi However, I go to school from time to time to pick them up. And a kiss and ride area would be perfect.
Schoolbus	Indeed, I do not understand why having an invitation for an interview with a teacher we cannot have access to the parking lot.
Schoolbus	I'm more concern for terrorist waiting the exit of school buses than parents with badges entering into the school.
Schoolbus	I work and I can't drive him on a regular basis
Schoolbus	only used garage for pick-up
Schoolbus	No other choice possible
Schoolbus	We leave far from the school so this is the surest way of transport. But we do bring the kids to school by car on some occasions. Less than before as it has become such an awful hassle with the current restrictions.
Schoolbus	C'est surtout pour venir RECHERCHER les enfants que la voiture est pratique dans notre cas, par exemple après le périscolaire ou le vendredi PM. Un accès au parking (ou dans la cour) est donc très pratique pour ça.

Kiss Ride Survey EEB3

Schoolbus	La solution du bus scolaire est agréable mais reste très chère lorsque l'enfant est en maternelle. Je ne voyais malheureusement pas d'autre solution si je voulais être à l'heure au bureau.
Schoolbus	limited parking options, time constraints combined with traffic
	Bus scolaire et transports publics. Difficile à gérer car on habite en dehors de Bruxelles.
	Zone dépose minute oui mais avec un badge associé à la plaque d'immatriculation des véhicules, par exemple. Les parents de maternelle devraient pouvoir se garer le matin. Les voitures garées pendant la journée devraient avoir des amendes et être enlevées par la police, elles sont garées à un lieu interdit...
Schoolbus	La question 7a veut dire "aucun d'accès au garage pour les parents" je présume.
Schoolbus	Petition ouverture garage kiss & ride si, mais uniquement avec badge "serieux" pour contrôle des entrées.
Schoolbus	et occasionnellement tram/métro
	The real issue is not dropping children in the morning - it's when we have to pick them up in the afternoon for activities or medical appointments. There's no parking to simply pick them up and Bd Du Triomphe is a very busy road. I think the idea of a kiss & ride is an excellent one but it needs to work in a consistent way at the end of school time as well (before the lower gate is open)
Schoolbus	Occasionally I drop her off by car.
Schoolbus	it's safe, less stressful for my children and for us as parents, economical and an ecologically responsible solution
	REPONSE A LA QUESTION 6 CI-DESSOUS(MENU DEROULANT INCOMPLET)
Schoolbus	7 ES
Schoolbus	It was the most practical solution, however there is a need for a kiss and ride from time to time.
Schoolbus	While the school bus exists the children will use this. If there is no bus service in the future we would drop them off by car.
Schoolbus	From time to time, it happens I drop / fetch my child at school
Schoolbus	gain de temps pour les enfants et les parents - pas de stress
Schoolbus	avoid traffic in and out
Schoolbus	S6ESA
Schoolbus	Ou métro si nous l'accompagnons
Schoolbus	The most convenient, but on Wednesdays and Fridays I pick him up from school.
Schoolbus	J'ai déposé mes enfants seulement exceptionnellement avec la voiture, d'habitude ils prennent le bus d'école
Schoolbus	it is the best way. The kids are safe and justified if they are late with the bus (not with the parents).
	- Reason: No parking possibility at school
Schoolbus	- Kids are not accompanied by an adult apart from the bus driver
Schoolbus	Metro pendant les 4 premières années à l'école. Maintenant bus d'école.
Schoolbus	Convenience

Kiss Ride Survey EEB3

Schoolbus only option, no parking available
Schoolbus cela change avec l'age: il est plus important d'avoir la voiture pour les maternelles
